Fall Grown Lawns are Best

PLATT'S LAWN GRASS SEED

The best time to make a lawn is in August and September, for there will be much less trouble with weeds than those sown in spring. Average weather conditions, too, are more favorable for germination of the fine seed, for a more sturdy root-growth, and, in short, a better lawn. Only suitable kinds of good, clean seed, showing high purity and germination tests should be used. There is no economy in cheap seeds.

PLATT'S EVERGREEN LAWN SEED

Best for general purposes. Contains heavy grade, thoroughly re-cleaned seeds only, of Kentucky Blue Grass, Red Top, Astoria Bent and White Clover. The many beautiful lawns that have been produced with Platt's Evergreen Lawn Seed and Platt's Shady Nook, about private homes, churches, universities and other public buildings are proof of the exceptionally high grade and suitable seeds used in these formulas. Please note that our seed weighs 31 lbs. per bushel. **Price: 1 pt., 45c; 1 qt., 84c; 5 lbs., \$3.85; 25 lbs., \$18.50; 100 lbs., \$71.00.**

PLATT'S SHADY NOOK. A formula containing Chewings Fescue. 1 pt., 45c; 1 qt., 84c; 5 lbs., \$3.85; 25 lbs., \$18.50; 100 lbs., \$71.00.

PLATT'S PREMIER. Contains Astoria Bent, Red Top and heavy Kentucky Blue Grass only. 1 pt., 60c; 1 qt., \$1.15; 5 lbs., \$5.60; 25 lbs., \$27.25; 100 lbs., \$106.00.
